

Meijer Brand Drug Store Gluten-Free Products

Reading the ingredient label

When reading product ingredient statements, it is important to note that all ingredients contained in the product must be listed. So, a can of kale may declare, "kale, water, and salt," those would then be the only ingredients contained in that product. If a product contains no ingredient list then the only ingredient is the product itself. You may come across the terms "natural flavors", "artificial flavors" and/or "spices" on the ingredient list. Natural flavors may contain gluten and/or other allergens; Artificial flavors and Spices however, would not contain gluten.

Reading the Meijer brand allergen list

This list identifies Meijer Brand products that to the best of our knowledge are gluten free and their potential allergens. Meijer works with our vendors and suppliers to investigate the gluten and allergen status of various products. This list does not contain all gluten free products available at Meijer and is supplied only as a guide to assist you in shopping. You should always confirm the status on the label and ingredient statement on the product.

Understanding cross-contact labeling

In compliance with government regulations, Meijer is not required to label a product manufactured in a plant which also processes additional allergens. Many of our suppliers will add this as an added convenience feature however, any "may contain" statements are at the manufacturers discretion. Meijer has very stringent procedures in place to ensure all USDA and FDA quality measures are met and that our own higher standards are followed regarding allergen handling.
